EDUCATION

Vellore Institute of Technology, Chennai

Aug 2022 - Aug 2026

B.Tech, Computer and Electronics Engineering (**CGPA : 8.22**)

Summary: Analytical B.Tech candidate skilled in Python, SQL, and ETL workflows, with experience building data pipelines, dashboards, and analytics that support decision-making across telecom, logistics, and risk domains.

EXPERIENCE

Smartvizx Pvt Ltd.(Trezi) | XR Development Intern | [Link](#)

Noida | Jun 2025 - Jul 2025

- Developed an AR furniture placement tool after analyzing user needs and spatial interaction patterns.
- Documented workflows, requirements, and insights to support cross-functional decision-making.
- Conducted usability studies and synthesized findings into structured reports, driving data-informed product improvements, and achieving measurable enhancements in user experience by 85%.

PROJECTS / OPEN-SOURCE

End-to-End Banking Risk & KPI Analytics | [Link](#)

- Built end-to-end SQL/Python ETL pipelines for 38K+ loan records, ensuring data quality and accuracy.
- Automated workflows reducing manual intervention by 40% and improving KPI accuracy for reporting.
- Designed KPI structures similar to exposure metrics used in traded risk (portfolio quality, risk segmentation).

Telecom Revenue Optimization Model | [Link](#)

- Delivered privacy-safe analytics, SHAP insights, and a dashboard with a report that cut decision time by 40%.
- Developed uplift and ARPU models simulating a 7% churn drop, 5% ARPU gain (\$4.7M), and a 15% ROI boost.
- Built a Revenue Optimization pipeline on 10K customers, achieving 84.7% churn AUC flagging 2K highrisk users.

Customer Lifetime Value (CLV) Prediction and Business Intelligence Dashboard | [Link](#)

- Engineered 15+ predictive models to estimate CLV using RFM analysis and regression techniques.
- Designed and deployed an interactive Streamlit dashboard for customer segmentation and actionable insights.
- Developed an end-to-end analytics pipeline encompassing data preprocessing, model training & result visualization.

Federated Spatiotemporal Traffic Forecasting - Scientific Report (Under Review) | [Link](#)

- Built an advanced forecasting framework capturing temporal & spatial patterns to improve traffic prediction.
- Evaluated cross-city forecasting methods and summarized key performance and robustness insights.
- Developed a federated learning pipeline with client-side validation, improving model stability and accuracy.

SKILLS

Analytics and BI:	Business Intelligence, KPI Reporting, Trend Analytics, Data Storytelling, Business Insights, Automation, ERP systems, A/B Testing, Process Mapping & Optimization, Audit-Ready Reporting, Stakeholder Communication
Data & Technical:	Python, SQL, Excel, AI/ML, ETL Pipelines & Data Modeling, API Integration, Data Pipelines & Automation, R Studio
Visualization:	Power BI, Streamlit, Dashboard Development, Matplotlib, Seaborn

CERTIFICATIONS

- Oracle Cloud Infrastructure Certified Data Science Professional - [Oracle](#)
- Google Advanced Data Analytics - [Google](#)
- McKinsey Forward Learning Program - [McKinsey & Company](#)
- UX & UI Design Certification - [Adobe](#)
- Machine Learning Internship Program - [Tryst IIT Delhi](#)

EXTRA-CURRICULAR RESPONSIBILITIES

- **Joint Secretary of Wakhra Punjab Club** - Led a 250+ member team and coordinated 20+ big college events.
- **Vice President of Athenaeum Club** - organized trips to historic sites & public events featuring prominent speakers.
